

Sales & Financial Performance Dashboard

Dashboard Design: Interactive Business Intelligence Dashboard

Tool: Microsoft Power BI

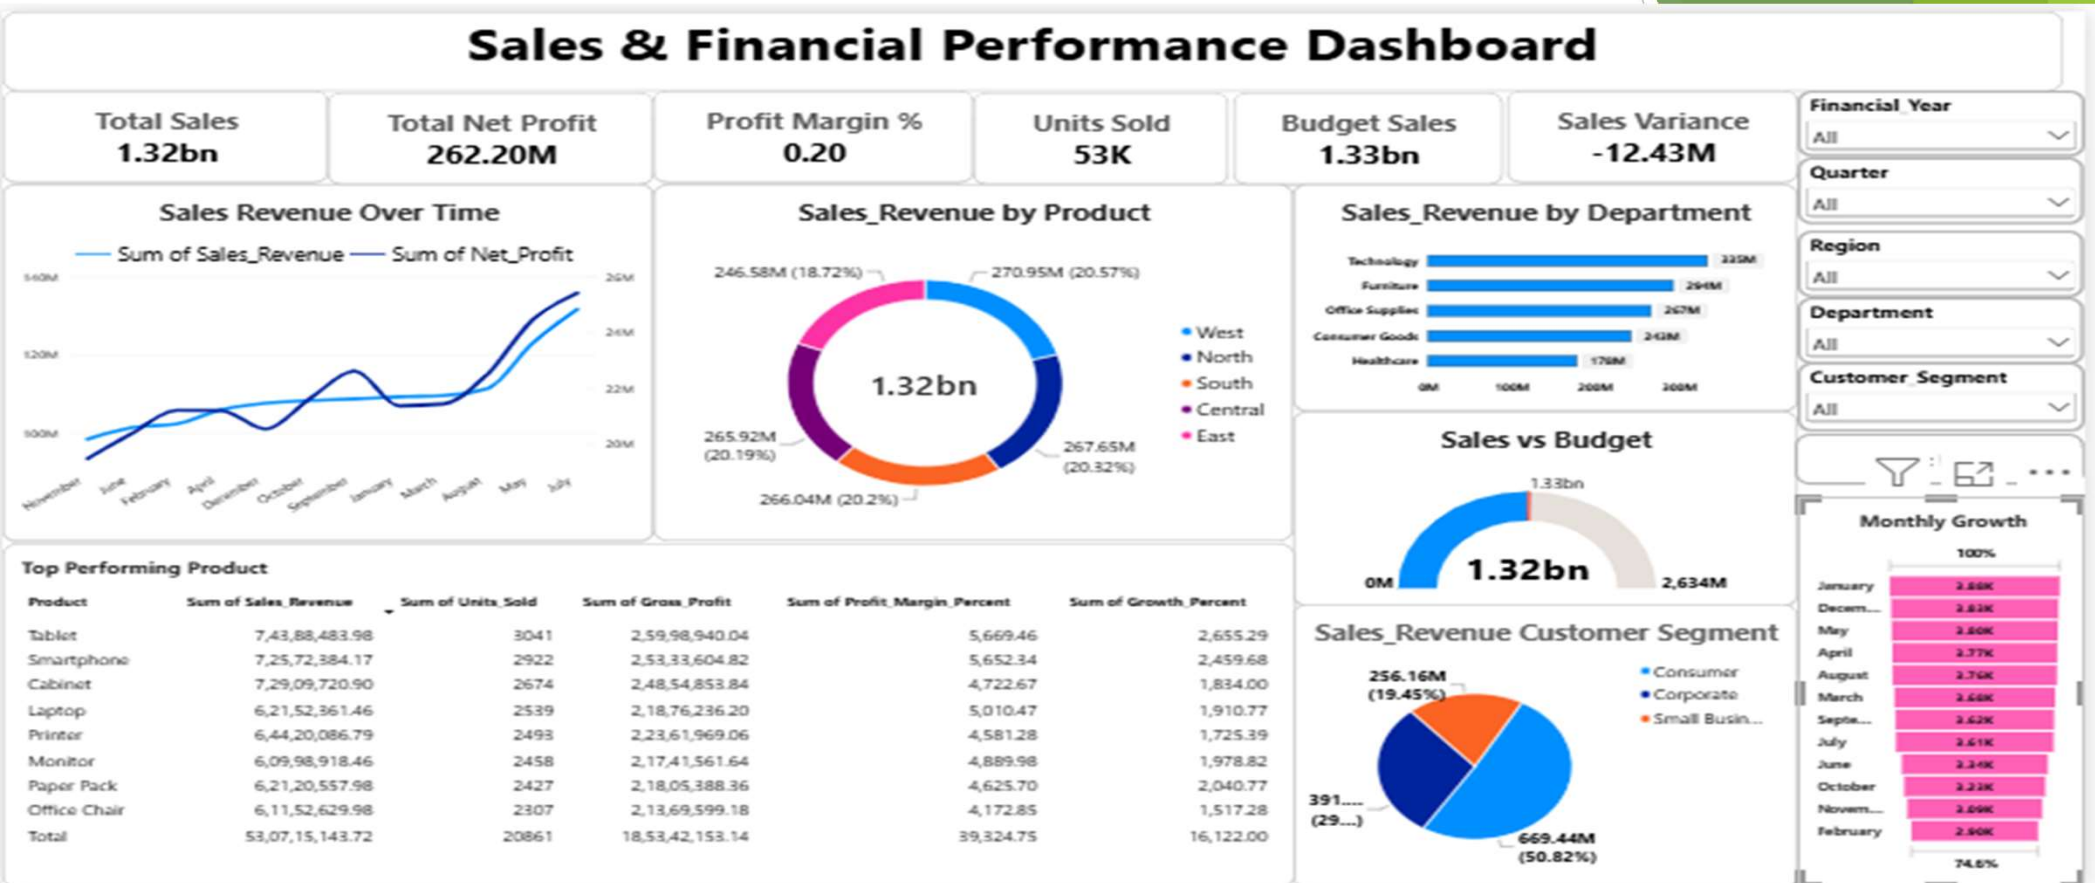

Dataset: Sales Financial Datasets

Prepared by: [Nitesh Prajapati]

Project Objective

- ▶ The objective of this project is to design an interactive dashboard that provides business stakeholders with a clear and comprehensive overview of sales and financial performance.
- ▶ **Key Objectives**
 - ▶ • Monitor Total Sales and Net Profit
 - ▶ • Analyze Profit Margin and Units Sold
 - ▶ • Compare Actual Sales with Budget Sales
 - ▶ • Track Sales Performance Over Time
 - ▶ • Identify Top-Performing Products
 - ▶ • Analyze Department Performance
 - ▶ • Understand Customer Segment Contribution
 - ▶ • Provide Interactive Filtering using Slicers

Interactive Sales & Financial Performance Dashboard

The dashboard integrates KPI cards, time-series analysis, product performance, department analysis, customer segmentation, budget comparison, and interactive slicers to support data-driven business decisions.

Key Performance Indicators

TOTAL SALES \$1.32B	TOTAL NET PROFIT \$262.20M	PROFIT MARGIN 20.0%
UNITS SOLD 53K	BUDGET SALES \$1.33B	SALES VARIANCE -\$12.43M

- ▶ KPI Interpretation
- ▶ The business generated approximately \$1.32B in sales and \$262.20M in net profit, resulting in a profit margin of approximately 20%. Actual sales are slightly below the budget target of \$1.33B, resulting in a negative sales variance of approximately \$12.43M.

Key Business Insights

- ▶ 1. Overall Sales Performance
 - ▶ Total sales reached approximately \$1.32B, indicating strong overall revenue generation.
- ▶ 2. Profitability
 - ▶ The business generated approximately \$262.20M in net profit with a profit margin of around 20%.
- ▶ 3. Budget Performance
 - ▶ Actual sales are slightly below the budget target, resulting in a negative variance of approximately \$12.43M.
- ▶ 4. Product Performance
 - ▶ The product analysis helps identify products contributing significantly to overall sales and profitability.
- ▶ 5. Customer Segment Performance
 - ▶ The dashboard allows stakeholders to compare revenue contribution across Consumer, Corporate, and Small Business segments.
- ▶ 6. Time-Based Performance
 - ▶ The sales trend and monthly growth analysis help stakeholders understand changes in business performance over time.

Tools, Dashboard Features & Conclusion

Tools Used

Microsoft Power BI

Sales Financial Dataset

Dashboard Features

KPI Cards

Interactive Slicers

Time-Series Analysis

Product Analysis

Department Analysis

Customer Segment Analysis

Sales vs Budget Analysis

Monthly Growth Analysis

Interactive Filtering

Conclusion

The Sales & Financial Performance Dashboard provides stakeholders with an interactive and comprehensive view of business performance. It enables users to monitor important KPIs, evaluate budget achievement, analyze sales trends, identify high-performing products, and understand customer segment performance for better business decision-making.
